Professional Summary

Full Stack Developer specializing in modern JavaScript ecosystems with hands-on experience developing AI-powered SaaS products, scalable web applications, and cloud-ready backend systems. Proficient in React, Next.js, Node.js, TypeScript, Express, MongoDB, PostgreSQL, Docker, Kafka, and AWS, with practical experience integrating LLMs and speech AI services. Strong problem-solving skills backed by hackathon achievements and award-winning academic projects. Eager to contribute as a Software Development Engineer in a fast-paced, product-driven team.

Technical Skills

- Frontend: JavaScript (ES6+), TypeScript, React.js, React Native, Next.js, Tailwind CSS, Shadcn
- Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, SQL, Redis, DSA
- Tools & Cloud: AWS (EC2), Docker, Kafka, Git, Google Gemini API, AssemblyAI, Vertex AI, AWS - GCP (familiar)

Professional Experience

- | | | | |
|---|-------------------------------------|------------------|--------------------------|
| Full Stack Web Developer | CVTPL | <i>Freelance</i> | 01/2026 - 06/2024 |
| <ul style="list-style-type: none">Developing NDA-protected full-stack scalable application and architectures for a confidential client. | | | |
| Full Stack Web Developer | TheFitsheets | <i>Freelance</i> | 07/2023 - 02/2024 |
| <ul style="list-style-type: none">Engineered a scalable e-commerce platform using Next.js, improving performance by 30% and customer retention by 25%.Optimized website performance by 30% using code splitting, SSR, lazy loading and memoization etc, enhancing user experience. | | | |

Projects

- | | | |
|--|--|----------------------------|
| Full Stack Developer | MergeLens – AI PR Risk Engine | 23/04/26 – 16/05/26 |
| <ul style="list-style-type: none">Engineered an asynchronous, queue-based PR risk analysis platform using TypeScript, Express, Redis, and BullMQ to handle concurrent webhook bursts and decouple processing from the API server, featuring secure X-Hub-Signature-256 verification, a custom diff parser, and an AST context indexer to evaluate code risk and recommend affected test suites.Leveraged BullMQ workers to orchestrate background risk-scoring pipelines integrated with Vertex AI, posting structured markdown reports to GitHub PRs and syncing status with a Next.js dashboard. | | |
| Full Stack Developer | MeetLog - AI Meeting Intelligence | 18/05/26 – 05/06/26 |
| <ul style="list-style-type: none">Architected an AI-powered meeting intelligence platform using a Next.js 16/Express monorepo, integrating AssemblyAI for high-accuracy transcription and Google Gemini API to extract decisions, action items, and blockers from uploaded audio.Developed secure integrations to push meeting artifacts to Notion and Slack via AES-256 encrypted tokens, persisting insights in PostgreSQL while utilizing TanStack Query for caching and optimistic UI updates. | | |
| Full Stack Developer | Blink.ai | |
| <ul style="list-style-type: none">Automated end-to-end video generation pipeline (script → render) using Gemini API and FFmpeg, with Kafka-based credit management for resource allocationImplemented credit-based resource management using Kafka and Docker, increasing user retention by 25% through improved allocation and deployment consistency. | | |

Achievements

- Best Project Award (BCA) – [Braintube](#) (07/2024) | Top 10/100 teams, GFG Hackathon – disaster management solution (08/2024)

Education

Master of Computer Applications Galgotias College of Engineering & Technology (AKTU)	Greater Noida	09/2024 - 9/2026 7.96
Bachelor of Computer Applications Microtek College of Management & Technology (VBSPU)	Varanasi	07/2021 - 7/2024 75%
Intermediate Education Swami Harsewanand Public School	Varanasi	07/2019 - 7/2021 94%
